## SUMMARY

Full-Stack AI Engineer shipping agentic backends, RAG pipelines, and the interfaces people touch. 3+ years across web, mobile, and cloud: 4 products live, including FaceGPT AI on iOS and Android.

## EXPERIENCE

**AI Full-Stack Developer** · Humanity Founders FULL-TIME · REMOTE Feb 2026 - Now

- Ship FaceGPT AI on iOS and Android end-to-end: model integration, mobile UX, backend services, and CI/CD release pipelines.
- Built Collegefind.ai, AI college counselling that builds student profiles, shortlists universities, and guides applications with RAG and live AI voice sessions.
- Built Collabiora, a health research platform: AI research chat, curated clinical trials, Stripe-powered expert bookings, and communities.

Full-Stack · Flutter · CI/CD · AI Integration

**Backend & Cloud** · Independent Projects 2024 - Mar 2026

- Provisioned and managed backend services on AWS EC2 and Google Cloud Platform virtual machines.
- Administered Linux servers via SSH, monitored long-running processes, and optimized system resources.
- Deployed backend applications, validated APIs with Postman, and secured deployments through environment and credential management.

AWS EC2 · GCP · Linux · SSH · Postman

**Full-Stack Engineer** · Independent Mar 2023 - Aug 2024

- Architected and developed full-stack web applications using React, Node.js, Express.js, MongoDB, and TypeScript.
- Designed RESTful APIs with structured routing, validation, JWT authentication, and role-based access control.
- Shipped admin dashboards and user progress tracking, deployed and debugged on Linux under Git workflows.
